

DATASHEET

Business Benefits

- Up to 90% reduction in IP management and monitoring
 - Up to 50% fewer helpdesk calls
 - Increased IT organization flexibility
 - Increased user productivity
 - Increased security and compliance
 - Reduced configuration errors
-

Say Goodbye to Spreadsheets and Hello to Automated IP Address Management

Do you know...

- If there are rogue devices on your network?
- How to find space for 6 new /22 networks, without a CIDR calculator?
- Which user had a particular IP address associated with a virus or security breach?
- How to safely delegate routine tasks to the help desk and other departments?

With Infoblox you can answer these questions and more. Your team can increase network availability while reducing the sheer amount of high-risk, manual tasks required to keep your network up-to-date, flexible and secure.

Overview

The Infoblox IPAM Express solution automates layers of critical time-consuming network tasks and processes, boosting network availability while increasing network flexibility. This new solution from Infoblox even allows for role-based delegation of critical duties, allowing your teams and your network to operate at peak efficiency. IPAM Express is easy to deploy and provides unmatched visibility into your network and connected devices making troubleshooting and security breach investigation faster and easier than ever. IPAM Express is compatible with any network and easily overlays any existing DNS /DHCP infrastructure.

Automate Repetitive Tasks

- Allocate networks without complicated calculations
- Assign IP addresses with mouse clicks
- Automatically discover routers, switches and connected devices

Delegate Routine Tasks

- Give different administrators role-based access to limited parts of the network
- Allow helpdesk staff to service simple requests

Reporting

- Find under/over capacity
- Avoid outages
- Ensure security and compliance

DATASHEET

“When calculating the time that used to be spent by our staff of experts addressing DNS, DHCP and IP address management issues with our old systems, we are now saving well over \$100,000 annually with the Infoblox platform.”

Manager, Network Services Infrastructure, Swedish Television

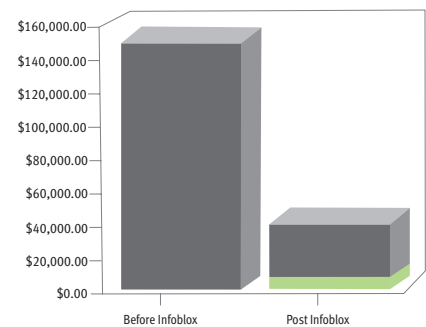

Use Cases

- Allocate networks or blocks of networks to functional groups, geographic regions, virtual server teams, and the like
- Allow helpdesk administrators to assign IP addresses to new servers and printers with a mouse click
- Allow regional administrator full control over their subnets
- Discover devices and infrastructure on your network and remove suspicious/unauthorized devices
- Find out which switch/port a specific user is connected to when troubleshooting network problems
- Trace the movement of a laptop as it moves from switch to switch to investigate security incidents
- Troubleshoot IP address conflicts easily

Infoblox IPAM Return on Investment

Infoblox IP address management solution reduces operating costs and increases IT flexibility by automating common network tasks and allowing delegation of routine tasks to helpdesk or lower level administrators and increasing IT organization flexibility. Most enterprises realize a positive ROI within the first year of solution purchase.

3 year DNS/DHCP/IPAM cost of ownership

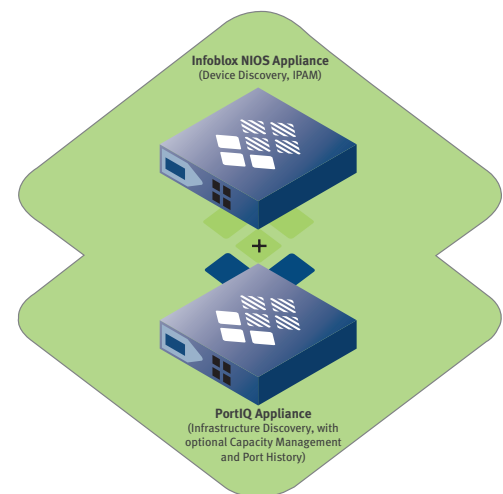

Infoblox IPAM Express Solution Details

The Infoblox IPAM Express consists of an Infoblox NIOS appliance paired with an Infoblox PortIQ appliance, each sized appropriately for the number of IP devices and ports in the network.

Combined power of Infoblox NIOS and PortIQ appliances brings together the logical and physical view of the network infrastructure to provide a rich IPAM solution.

Infoblox provides two options for quickly adding IPAM overlay to your existing infrastructure –

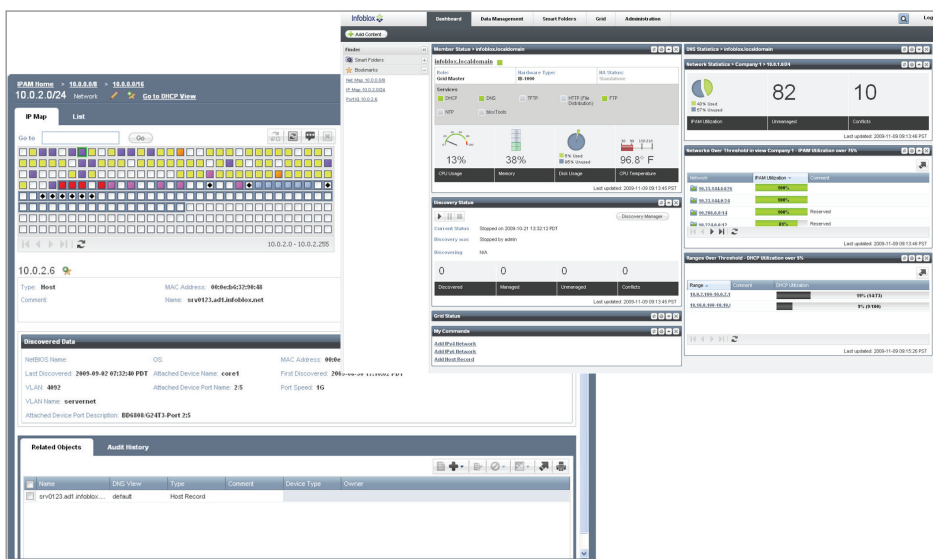

IPAM Express:

This version provides all of the IP address management functions described in this document.

IPAM Express plus:

This version provides all of the functionality of the IPAM Express solution. In addition, this version adds switch/port usage history for switch capacity planning and tracing the switch/port connection history for trouble-shooting network issues.

Infoblox IPAM capability is accessed through an intuitive web based interface that provides a visual representation of your network and its state.

The following sizing chart summarizes the appliance requirements by the number of active IP addresses in the network.

Infoblox IPAM Express Solution Sizing		
Number of active IP addresses	IPAM Express	IPAM Express Plus
Less than 10,000	Infoblox 550-A + PortIQ SME	
10,000 – 50,000	Infoblox 1050-A + PortIQ 1050-A (IPAM Connector version)	Infoblox 1050-A + PortIQ 1050-A (Capacity Management version)
Greater than 50,000	Infoblox 1550-A + PortIQ 1550-A (IPAM Connector version)	Infoblox 1550-A + PortIQ 1550-A (Capacity Management version)

Infoblox Product Warranty and Services

The standard hardware warranty is for a period of one year. The system software has a 90-day warranty that will meet published specifications. Optional service products are also available that extend the hardware and software warranty. These products are recommended to ensure the appliance is kept updated with the latest software enhancements and to ensure the security and availability of the system. Professional services and training courses are also available from Infoblox. Information in this document is subject to change without notice. Infoblox Inc. assumes no responsibility for errors that appear in this document.
